

OCTAGON FRAMES.

TRANSFORM YOUR OUTDOOR SPACE.

OCTAGON FRAME RANGE.

VERSATILE, DURABLE, AND VIBRANT OUTDOOR FITNESS SOLUTIONS.

The Octagon frame range from Escape Fitness is designed to bring the versatility and functionality of indoor gym equipment to the great outdoors.

Manufactured in our UK facility, these durable, weatherproof frames are built to withstand the harshest conditions, from the snowy peaks of the Alps to the scorching deserts of Nevada and Texas. With vibrant colors and a special paint treatment, these frames are not only functional but also visually striking, enhancing any outdoor fitness space.

SEALED.

Unused holes, plugged and sealed.

EXTERNAL SHELVING.

Specialised external shelving drilled to prevent water pooling.

OCTAGON FRAMES.

PREMIUM TREATMENTS FOR ULTIMATE DURABILITY.

Octagon frames are engineered with superior materials and treatments to ensure exceptional durability and aesthetic appeal. Each component is carefully made and treated to withstand the toughest environments while offering customizable options to fit your specific needs. Key features include:

FULLY WELDED.

All seams and joints are fully welded to eliminate potential water ingress points. This is essential to prevent water accumulation leading to internal erosion, causing rust formation from the inside out. This process seals the frame, providing a robust defence against rust.

SEALED TO PROTECT.

To prevent water getting inside the frame, all unused holes are plugged with stainless steel bolts and sealed with silicone to seal the box section.

SPECIALLY TREATED FRAME.

Our frames are blasted to leave an even finish before being hot zinc sprayed to give a zinc rich coating, a final powder coat ensures long-lasting durability and resistance to the elements.

ALL-WEATHER SHELVING.

Shelving treated and specially drilled to prevent pooling, with the same durable finish as the frame for outdoor use.

STAINLESS STEEL ATTACHMENTS.

Our most popular attachments are made with stainless steel, designed to resist corrosion, they maintain their quality and appearance over time.

WARRANTY COVERAGE.

10 years on the frame and steel attachments and components.
1 year on consumable attachments and parts.
Please refer to the warranty document for exclusions.

EXTERNAL FRAME INSTALLATION, PARTS AND ATTACHMENTS.

RULES AND REGULATIONS.

We recommend bolted frames for external use. Please check Local, County, State regulations for rules around placing freestanding frames in individual states in the USA.

FUNCTIONAL EQUIPMENT STORAGE SOLUTIONS.

Introducing Escape's Portable Storage Unit – the ultimate commercial-grade rack for your facility!

Designed to support group training and exercise classes, this versatile rack is mounted on heavy-duty lockable castor wheels, making it easy to move around. It can hold free weights, weight plates, and various functional fitness items, ensuring everything you need is always within reach whilst exercising outdoors*.

*Not recommended to be left permanently outdoors. Please refer to PIG010 Product Information Guide on the correct use of Escape Racks (<https://escapefitness.com/support/product-information-guides/>).
